

22 June 2021

**Future Energy Asia Exhibition & Summit 2021 Will Be Held Online from 25 to 27 August 2021; Meet Asia's Energy Leaders Live and Connect with Multi-Billion-Dollar Energy Projects**

The 2021 edition of Future Energy Asia Exhibition & Summit will now take place online from 25 to 27 August 2021. The event welcomes Energy Ministers, industry CEOs across the gas, LNG, renewables and power sectors.

Our Thailand stakeholders are fully committed to delivering a safe and influential exhibition and summit dedicated to the region's energy transition and transformation. In light of the current COVID situation in Thailand and out of an abundance of caution, the organisers and stakeholders have together taken the decision to move the event online.

The organiser will extend necessary support to all customers to facilitate a seamless transition to the new event format. The online platform is well utilized and reviewed across our global flagship events.

Officially hosted by the Ministry of Energy, Thailand and co-hosted by EGAT and PTT, Future Energy Asia Exhibition and Summit is an inclusive platform convening energy industries and policy makers in dialogues around multi-billion investment plans and cooperation driving the region's energy transition.

The Future Energy Asia 2021 programme connects you to the fast growing economies of ASEAN, including decision makers and buyers of (a) USD 281 billion investment opportunity in renewables projects between 2018-2025 and (b) 83 MTPA LNG market growth between 2019-2040.

We look forward to welcoming you this August. Together, we can accelerate the energy transition pathways collectively through open dialogue, exchange and business opportunities. For more information of the excellent programme line-up, please [see here](#).
